

MULAGO SMART GUIDE

Budget Proposal

From MVP to full operations

Phase 1 Costs

Design Tools

Utilized UGX 75,000 for Figma team plan, enhancing our design and collaboration capabilities efficiently.

Connectivity

Invested UGX 150,000 in internet bundles for effective field mapping at Mulago Hospital.

Cloud Setup

Allocated UGX 75,000 for domain registration and low-tier hosting to establish our online presence.

Production App Development

The **total budget of UGX 60,000,000** is allocated for a structured 4-month sprint. This budget allows our founding team of seven to receive realistic milestone bonuses, ensuring a high-quality delivery of a production-ready application. By moving beyond a sweat equity model, we can guarantee that the project meets all operational standards and timelines effectively.

Annual Costs

Cloud Infrastructure

Essential for maintaining app functionality, we budget UGX 2,400,000 for annual cloud services.

Third Party APIs

Utilizing various APIs, we allocate UGX 2,000,000 yearly to enhance app features and user experience.

On-Site Maintenance

Regular updates and replacements, including signage and QR codes, require UGX 1,500,000 annually for upkeep.

Legal and Equity

Share Protection

Proper registration safeguards investor shares during fundraising, ensuring legal security for all stakeholders.

Structuring Agreements

Drafting SAFE or shareholder agreements protects founders' control while attracting potential investors and partnerships.

Compliance Registration

Registering with data protection authorities enhances credibility, mitigating legal risks while handling sensitive patient information.

71,800,000

Total investment required

60,000,000

Budget for app development

7,000,000
