

Colorful Paper Mâché fruits

for Early Childhood Learning

creative. interactive. Educational. Eco-friendly

OVERVIEW

This project focuses on creating colorful paper mache as Educational learning aids for Nursery children. It combines creativity, interactive learning and eco-friendly materials to make learning more engaging and enjoyable

BACK GROUND OF THE STUDY

Nursery children learn better through visual and practical materials. However many schools rely on charts and drawings. This project introduces paper mache fruits to improve interactive learning and classroom participation

PROBLEM STATEMENT

Many nursery schools lack affordable and interactive teaching aids. Traditional charts provide limited learner engagement. This project aims to create creative and practical learning materials for Nursery education

AIM OF THE PROJECT

To produce paper mache fruits that can be used for Education purposes by nursery children

OBJECTIVES

- To create different fruit models using paper mâché
- To promote interactive learning among children
- To produce affordable and eco-friendly materials.
- To improve children's understanding of fruits, colors, and shapes

PAPER LAYERING

Tear newspapers into small strips and layer them on the balloon using glue.

DRYING

Allow the layered paper to dry completely. This may take 24-48 hours.

PAINTING

Apply base coat and paint the fruit with bright and attractive colors.

ADDING DETAILS

Add stems, leaves and other details. Let the paint dry completely.

FINISHING

Seal with varnish for durability and a smooth finish. Your paper mache fruit is ready!

TOOLS AND MATERIAL

- Old newspapers or papers
- Glue
- Water
- Scissors
- Paint
- Paint
- Brushes

TARGET AUDIENCE

OUTCOME

Importance of the Project

This project helps improve interactive learning among nursery students. It also promotes creativity, environmental awareness through recycling, and the use of affordable educational materials. The colorful fruit models make learning more enjoyable and engaging for children.
